

Experience of Math and Science Teachers 2012 2016

The tables below present the number of employed Mathematics and Science teachers, as reflected in the PEIMS data, with years of experience in the Texas public school system. The first table shows the number of teachers and average years of experience. It breaks experience into 9 year ranges and provides the percentage of teachers within each range. The second table breaks the 0-9 year range into individual numbers of years.

Definition. Experience is number of years in the Texas public school system.
